

The LIGHT^{est} Project

Lightweight Infrastructure for
Global Heterogeneous Trust management in support
of an open ecosystem of stakeholders and trust schemes

- Creating a global trust infrastructure for publication and querying of trust schemes
- Providing a solution to distinguish legitimate identities from frauds
- Make it automatic for verifiers to query trust lists and combine multiple queries to validate
- Accommodate diverse perceptions of trust

Content:

- Project Start: September 2016
- Duration 36: months
- Coordinated by Fraunhofer
